Crime in NSW – Are you any safer?

Short blurb on NSW crime reporting shown by local government areas from 1995 to 2011

- Levels of crimes against people, crimes against property, crime against society (created by me since there are 21 offence types)
- Only shows reported acts (some things go unreported)
- See crime across the state, across your area, or by offences

What do you think has happened to crime in NSW from 1995 to 2011?

**Went
Down?**

**Stayed
Level?**

**Went
Up?**

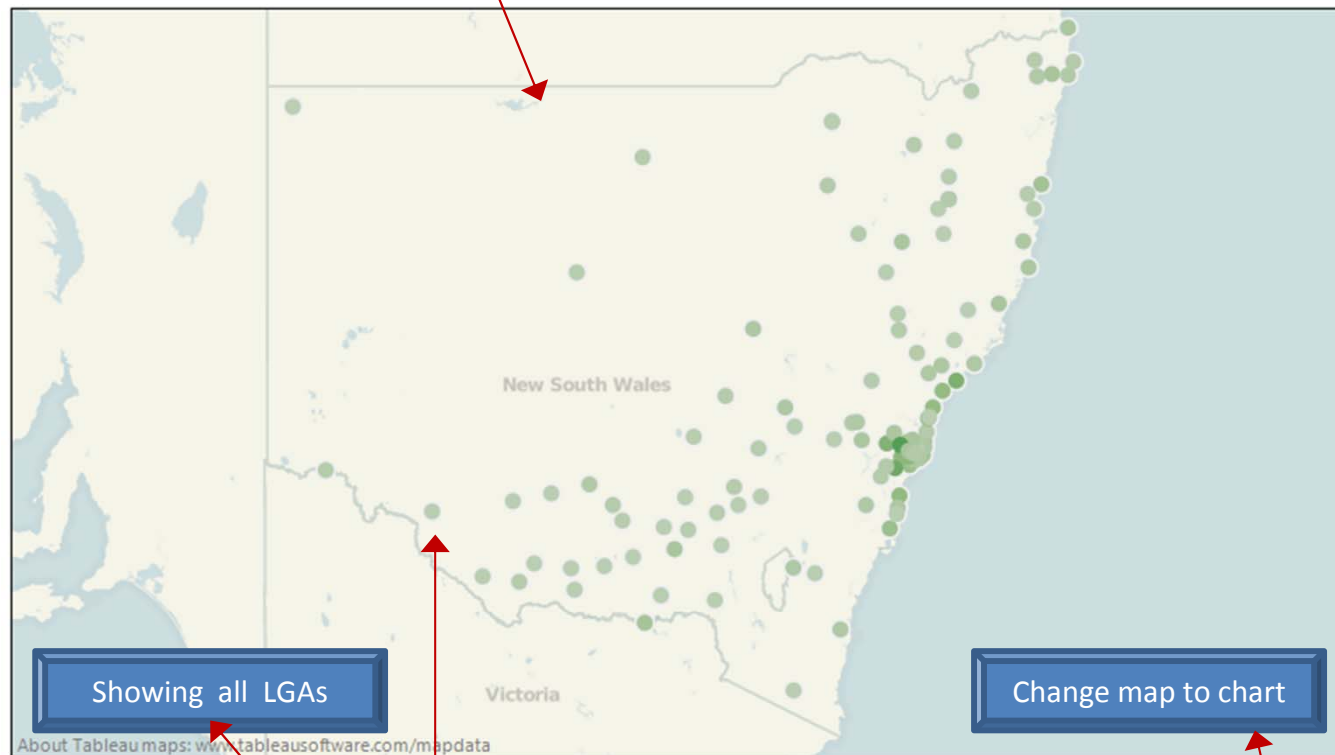

This is how close I got with Tableau

Data on map would be shown as offence per 100k population (not done here)

Offence category filter impacts the map, as well as the trend chart, and highlights itself within the side bar chart

Slider controls year of map and side bar chart, is shown as an indicator moving along the bottom line chart

Highlighting any place would show that data point and also possible to select it as a filter which would impact the trend chart and bar chart. Button changes text when filter is on to show option to reset (not part of my tableau work – hence the colour)

Button to change map into column chart to show different geography (not part of my Tableau work)
